

Your cycling performance results! -Aptomy server

2015-05-19

cycling duration analyzed(min): 1.7

average cadence(pedal strokes/min): 74

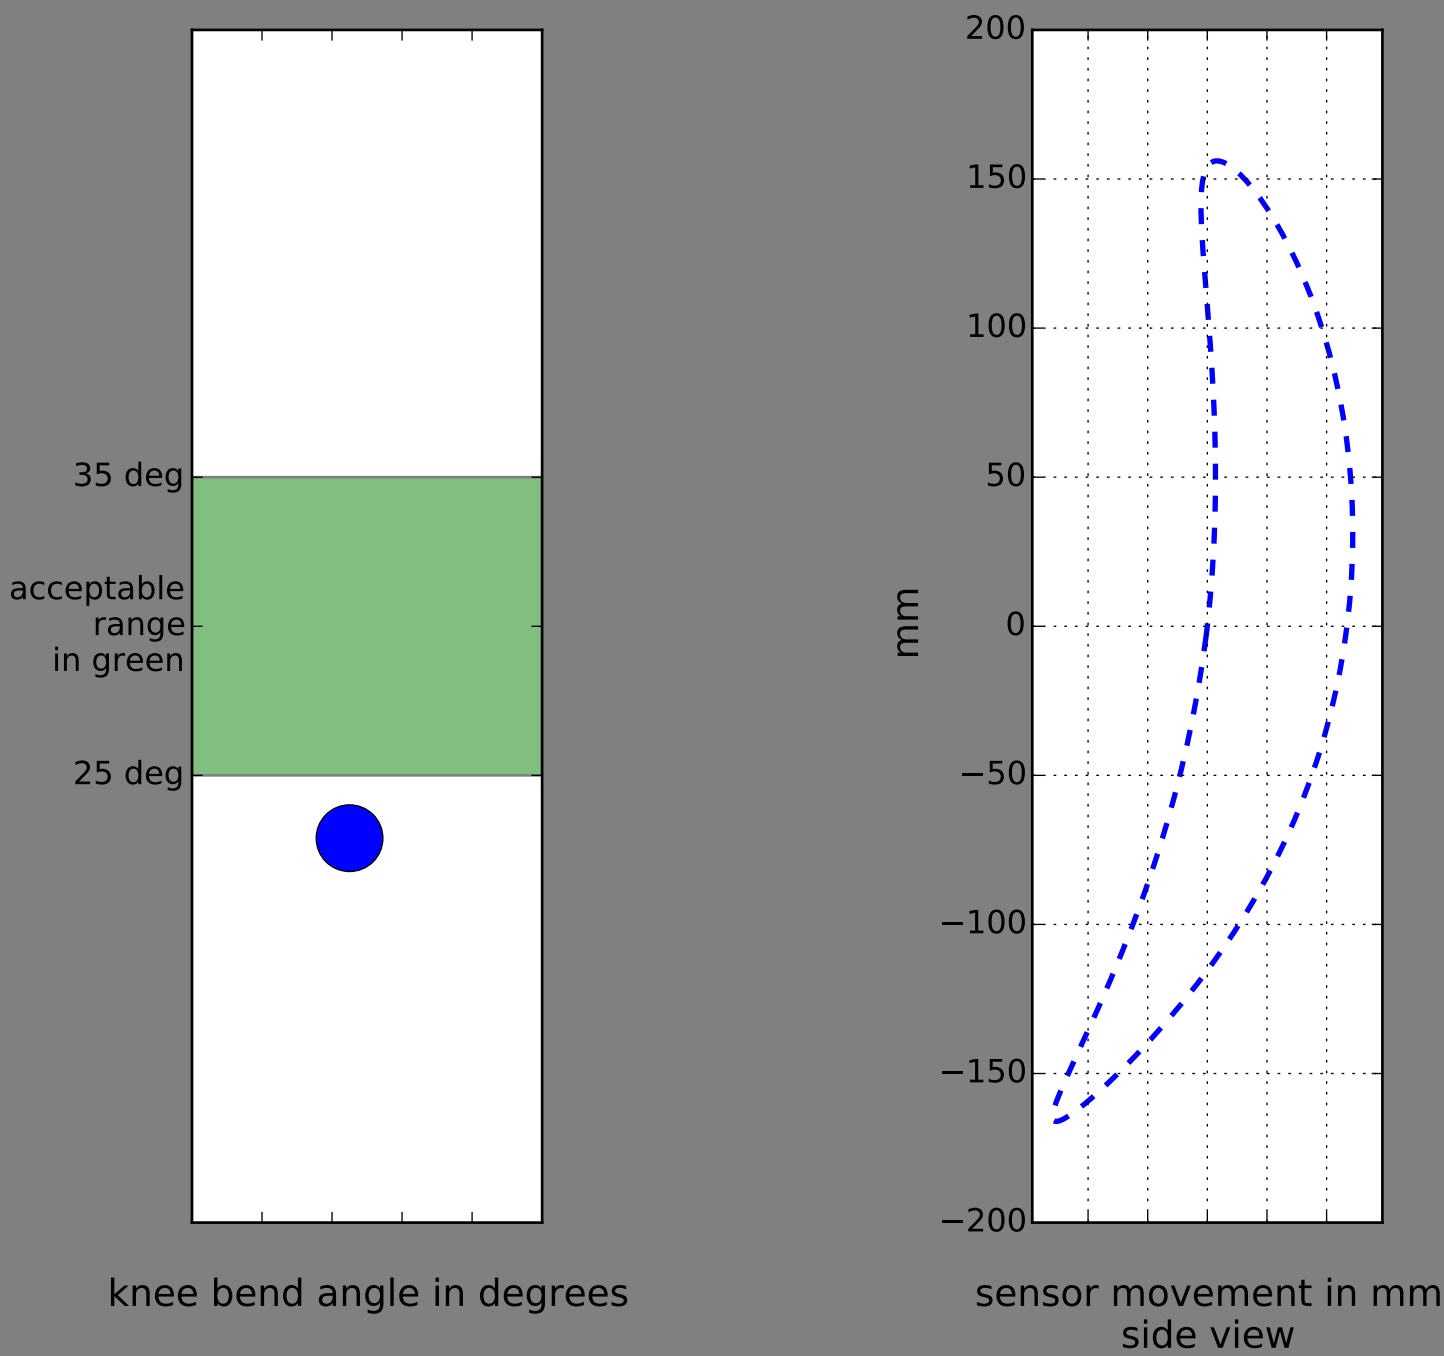

of pedal strokes analyzed: 88

% of cycling data analyzed: 100

sensor sample rate: 10

Saddle height analysis

Saddle height maybe too HIGH,
raising it may improve performance!

Side-to-side knee motion analysis

Side-to-side knee motion within recommended range!
